

Safe Access Valves

KEY FEATURES

- Safe access valves, designed to use on the end of HVAC hoses to eliminate any potential refrigerant burns to hands
- Gives control to the user to accurately reduce or increase refrigerant flow
- Easily reduce and lock off the refrigerant flow from your hoses before disconnecting from the system
- Flow lock off feature
- Compatible with all refrigerants (except ammonia and CO2)
- Allows safe access with zero liquid refrigerant burns

Description	Part No.
1/4" x 1/4" Safe access valve	JAV-1368
1/4" x 5/16" Safe Access valve	JAV-1369
5/16" x 5/16" Safe Access valve	JAV-1370
